Contents

Volume 56 Number 1

AUTHORS		EDITORIAL
Dr A P Webb	1	E-MRS 1999 spring meeting
		ARTICLES
W G Graham, C M O Mahony and P G Steen	3	Electrical and optical characterisation of capacitively and inductively coupled GEC reference cells
C V Budtz-Jørgensen, J Bøttiger and P. Kringhøj	9	Energy spectra of particles bombarding the cathode in glow discharges
M D Whitfield, R B Jackman and J S Foord	15	Spatially resolved optical emission spectroscopy of the secondary glow observed during biasing of a microwave plasma
R Martins, V Silva, I Ferreira, A Domingues and E Fortunato	25	Role of the gas temperature and power to gas flow ratio on powder and voids formation in films grown by PECVD technique
H Águas, R Martins and E Fortunato	31	Plasma diagnostics of a PECVD system using different R.F. electrode configurations
Sz Kátai, Z Tass, L Bori, Gy Hárs and P Deák	39	Plasma analyser for plasma-assisted surface process diagnostics up to 100 mbar
H S Kim, D H Lee, J W Lee, T I Kim and G Y Yeom	45	Effects of plasma conditions on the etch properties of AlGaN
J Baborowski, P Muralt, N Ledermann and S Hiboux	51	Etching of RuO_2 and Pt thin films with ECR/RF reactor
A Piotrowska, E. Kamińska, T T Piotrowski, M Guziewicz, K Golaszewska, E Papis, J Wróbel and L Perchuć	57	Application of CCl_2F_2- and CCl_4-based plasmas for RIE of GaSb and related materials
J Walkowicz, J Smolik and K Miernik	63	Research on physico-chemical bases of the ion nitriding process control with the use of plasma spectroscopic diagnostics
Ph Bertrand, M Ignatiev, G Flamant and I Smurov	71	Pyrometry applications in thermal plasma processing
J W Bae, H J Kim, J S Kim, N E Lee and G Y Yeom	77	Effects of oxygen ion beam plasma conditions on the properties of Indium tin oxide thin films
G Dinescu, B Mitu, E Aldea and M Dinescu	83	A double-chamber capacitively coupled RF discharge for plasma assisting deposition techniques

Volume 56 Number 2

AUTHORS		EDITORIAL
G Carter	87	Preferred orientation in thin film growth — the survival of the fastest model
S Wang, H Liang and P Zhu	95	Epitaxial growth of alloy Cr(Ni)Si_2 by metal vapour vacuum arc ion source implantation and post-annealing
N Barreau, S Marsillac and J C Bernède	101	Physico-chemical characterization of β-In_2S_3 thin films synthesized by solid-state reaction, induced by annealing, of the constituents sequentially deposited in thin layers
C Engström, T Berlind, J Birch, L Hultman, I P Ivanov, S R Kirkpatrick and S Rohde	107	Design, plasma studies, and ion assisted thin film growth in an unbalanced dual target magnetron sputtering system with a solenoid coil
R Schennach, D G Naugle, D Cocke, R Dembinski and J A Gladysz	115	Surface reactivity studies of bimetallic complexes, (η^5-C_5Me_5)Re(NO)(PPh_3)($C{\equiv}C)_n$(Ph_3P)(ON)Re(η^5-C_5Me_5) (n = 2, 4, 6): candidates for molecular wires
Y Qiao and H Bu	123	An investigation on suction force of vacuum pumps for micro-components
N Mutsukura	129	Deposition of hydrogenated carbon film in a magnetically confined CH_4 rf discharge
J-S Heo and Y-K Hwang	133	DSMC calculations of blade rows of a turbomolecular pump in the molecular and transition flow regions
P Gao, L J Meng, M P dos Santos, V Teixeira and M Andritschky	143	Characterisation of ZrO_2 films prepared by rf reactive sputtering at different O_2 concentrations in the sputtering gases
	149	BOOK REVIEW

Volume 56 Number 3

AUTHORS		EDITORIAL
J S Colligon	151	Editorial
W Ahmed, C A Rego, R Cherry, A Afzal, N Ali and I U Hassan	153	CVD diamond: controlling structure and morphology
P J Kelly and R D Arnell	159	Magnetron sputtering: a review of recent developments and applications
S R Bradbury and T Huyanan	173	Challenges facing surface engineering technologies in the cutting tool industry
R Penlington	179	Surface engineering in the glass container industry
H Wei, Z Liu and K Yao	185	Influence of microstructure of substrate surface on early stage of thin film growth
J Kołaczkiewicz	191	Thermal stability of the atomic structure of ultrathin films of Eu, Gd and Tb adsorbed on W(110)
G Velu and D Remiens	199	In situ deposition of sputtered PZT films: control of the growth temperature by the sputtered lead flux
D J Li, F Z Cui, H Q Gu and W Z Li	205	Ion beam-assisted deposition of DLC films on PMMA and TiN/PMMA

S Kurokouchi and S Kato 213 Outgassing characteristics by mechanical action of all-metal gate valve

H Errahmani, A Berrada, G Schmerber and A Dinia 221 Magnetic and transport properties of ion beam sputtered Co_xCu_{1-x} granular alloys

Volume 56 Number 4

AUTHORS EDITORIAL

V E Yurasova and John Colligon 227 Editorial

Kenji Morita 233 Studies on energy distributions of species ejected from solid surfaces by means of multiphoton resonance ionization spectroscopy

V I Bachurin, P A Lepshin and V K Smirnov 241 Angular dependences of surface composition, sputtering and ripple formation on silicon under N_2^+ ion bombardment

A A Promokhov, A S Mosunov, S S Elovikov and V E Yurasova 247 Features of sputtering of nitrides with various component mass ratios

V A Kurnaev, N N Trifonov, M N Drozdov and N N Salashchenko 253 On the possibility of the in situ growth control and nondestructive depth profiling of ultrathin multilayer structures using keV hydrogen ions

S F Belykh, U Kh Rasulev, A V Samartsev, and L V Stroev and A V Zinoviev 257 High non-additive sputtering of silicon as large positive cluster ions under polyatomic ion bombardment

Zdeněk Šroubek and Jan Lörinčík 263 Electronic excitations in solids during impact of atomic particles

V Philipsen, J Bastiaansen, P Lievens, E Vandeweert and R E Silverans 269 Resonant electron transfer in the emission of ion-beam sputtered metal atoms studied by double resonance laser ionization

A A Pisarev and A M Vaitonene 275 Sorption of athermal hydrogen atoms

Yu N Devyatko and S V Rogozhkin 279 Point defects at low-index surfaces of fcc metals and the anomalous behaviour of surface atoms at elevated temperatures

N M Sushkova and A G Akimov 287 Formation of 3D islands of metal oxides on silicon covered by native oxide film by multi-step ion sputtering of Ti, Nb and V

E Yu Usman, Yu T Matulevich and I F Urazgil'din 293 Calculation of electronic temperature dynamics in a collision cascade in a solid
